How to use LIMITERS to filter Discovery search results

By DEFAULT, all Discovery searches are limited to full text items that are available through Calarco Library, physically and digitally. Refine your results by adding additional limiters.

CATALOG ONLY - Includes only items that are physically located in the library, or e-books that are included in the library catalog.

SUBJECT - Breaks down the topic into smaller categories by adding descriptors to it.

LOCATION - Limit by location within Calarco library: Stacks (non-fiction located on the lower level), Reference (non-fiction located on the upper level), Fiction, Graphic Novels, etc.

DATABASE - Choose databases recommended for this assignment by your librarian or teacher.
